

Place holder document

Some local documentation not yet available.

Some of the local documents *depend on the FM version* and hence can not be provided in the installation files. Hence they must be loaded on the user's system:

FM##-UserGuide.pdf

FM##-INI-reference.pdf

FM##-MIF-reference.pdf

If you want to use them locally, please follow the instructions given here:

- 1 Start the installation program (**Install-ETB14up-en**) by means of its short cut in the Startup menu D+DD.
- 2 Use the **Un-install** button.
- 3 ETB will be un-installed
- 4 Start the Installation program again.
- 5 Check the box *Download and install FM-version dependent PDF files*
- 6 Use the **Install** button.

The files are downloaded from the server of the author (the same where You got the ETB installation).

Short period after a new FM version has been released the documentation often is not current - not updated fully for that release - in the opinion of Klaus Daube.

In this case I place a note into the PDF - and you may check for a newer version later (just go to the URL daube.ch/docu/fm-documentation/FM

.
