Import from Word

Overview

This chapter gives an example of an import from Word 2000 (Word 9.0). The FrameMaker filter states Word 6/7.

All the input from the second line on the second page on was imported by copy to be able to modify it.

How to proceed after the import is described starting with page 7.

Contents

How to proceed after the import	7

Test for import to FrameMaker

This document was produced with Word 9.0 (Word 2000).

Here comes a Heading 3

- First item of bulleted list, style DDD
- Second item of DDD bulleted list

Again, just a standard paragraph, but with **bold** and *italic* local formatting²⁾. A second footnote³⁾. Now let's try some more stuff. How about one of those darn frames?

This frame is 8cm wide and at least 2cm high.
It's anchor is locked. It is positioned to the paragraph on the right. Paragraph format has border.

Here comes the paragraph just to the side of the frame (Frame uses "text wrapping").

This is still right to the frame. some more text will flow beneath the frame back to the left close to the margin. You can see this here.
Frames are only located correctly in Page Mode - a very strange feature.

Add a table (tab-head, tab)

Heading cell	Second heading cell	Third heading cell
Ordinary cell	next column	next column
Third row in this table. First two columns are spanned (merge cells)		This is the third column.
Back to normal now	Again a single cell	And here comes the last entertainer of this morning.

Now let's look at generated list numbering and bulleting

- ² First item of Word bullet list
- ² Second item

And how about numbered lists? Are there numbers in Frame? What kind of style?

1. First item of Word numbered list
2. Second item of Word numbered list

2 This is a footnote (Footnote Text). I have just used some text here to get more than one line of print and so on and so forth.

3 The second footnote is not that long.

3. Third item

In the document you can't see what Word is really doing here. Just for shure: the numbers and bullets are not in field codes — hence can not be revealed! Is there an m-dash in the previous sentence?

How about character formatts?

This is done in computer and this is *1highlight*. And this here is **2highlight**. All the rest of this paragraph ist just normal...

In this para we have set some tabstops. The tab stops in Normal are on 2.5, 5, 7.5, 10, 12.5 and 15cm.

go to stop and hereand
there.

How to proceed after the import

The original FM document comprises a host of paragraph formats, for example:

1heading, 2heading, 3heading, bodytext, n1-numbered-1st, nx-numbered-next ...

After the import the paragraph catalogue does not contain more than these, but the imported text contains additional formats from the Word document:

Heading 1, Heading 3, tab, tab-head, Normal, Footnote, ...

All of these are local overrides to the bodytext format. This was the format of the paragraph to which the import happened.

Note: *Be aware, that bulleted and numbered lists in Word are just format Normal. You must apply a correct FM format to these paragraphs, e.g. lb-bulleted-list*

Clear the format mess

To clear the format mess, you need to rename the Word format names to the corresponding FM-format names:

Vord format name	FrameMaker format name
Heading 1 (watch the blank!)	1heading
Heading 3	3heading
Normal	bodytext
Footnote	zfn-footnote
...	...

Rename formats

The procedure is explained with the imported format Footnote:

- 1 Place the cursor in an imported paragraph, the format displayed in the message area of FM (bottom left) be *Footnote.
- 2 Open the Paragraph designer. The Word format name is displayed in the **Paragraph Tag** field (Footnote without the asterisk, which just an idicator).
- 3 Select the text in the field and replace it with the FM name: zfn-footnote.
- 4 Click the **Update All** button and confirm the name change in the upcoming message.
- 5 You will not notice a change in the appearance, because the FM format is changed to what Word provided...
- 6 Repeat steps 1 to 5 for all Word formats.

Re-import FM formats

- 7 After you have changed all Word format names to the corresponding FM format name, you need to re-establish the FM fomats: import all formats from a correct FM documents using the desired styles.

Refinement of the import

You will find yourself with a number of additional tasks to clear out the imported text:

- 1 Images are mangled up. Remove them from the Word document prior to the import and save them in distinct files to be imported by reference into FrameMaker afterwards
- 2 Anchored frames in Word are not converted to anchored frames but simple text frames.
- 3 You must fix the list issue
- 4 You will have lost all character formats, because only very few people are aware of this feature of Word and use the Bold or Italic buttons...
- 5 Apply table formats
- 6 Format cross-references
- 7 Remove the implicit bullets and number and the superfluous TABs in lists.
- 8 Strip TABs from footnotes
- 9 etc.

See also appendix E in the handout for the course “FrameMaker for Scientific Publications”.

The final work

The following pages display, how it can look after about 1/2 h of work.

Test for import to FrameMaker

This document was produced with Word 9.0 (Word 2000).

Here comes a Heading 3

- •First item of bulleted list, style DDD
- •Second item of DDD bulleted list

Again, just a standard paragraph, but with **bold** and *italic* local formatting¹⁰⁾. A second footnote¹¹⁾. Now let's try some more stuff. How a bout one of those darn frames?

This frame is 8cm wide and at least 2cm high. It's anchor is locked. It is positioned to the paragraph on the right. Paragraph format has border.

Here comes the paragraph just to the side of the frame (Frame uses "text wrapping").

This is still right to the frame. some more text will flow beneath the frame back to the left close to the margin. You can see this here. Frames are only located correctly in Page Mode - a very strange feature.

Add a table (tab-head, tab)

Heading cell	Second heading cell	Third heading cell
Ordinary cell	next column	next column
Third row in this table. First two columns are spanned (merge cells)		This is the third column.
Back to normal now	Again a single cell	And here comes the last enter-tainer of this morning.

Table 1: Word tables do not convert with heading rows - handwork is needed

Now let's look at generated list numbering and bulleting

- First item of Word bullet list
- Second item

And how about numbered lists? Are there numbers in Frame? What kind of style?

- 1 First item of Word numbered list
- 2 Second item of Word numbered list
- 3 Third item

In the document you can't see what Word is really doing here. Just for shure: the numbers and bullets are not in field codes

¹⁰ This is a footnote (Footnote Text). I have just used some text here to get more than one line of print and so on and so forth.

¹¹ The second footnote is not that long.

— hence can not be revealed! Is there an m-dash in the previous sentence?

How about character formats?

This is done in computer and this is *1highlight*. And this here is **2highlight**. All the rest of this paragraph ist just normal...

In this para we have set some tabstops. The tab stops in Normal are on 2.5, 5, 7.5, 10, 12.5 and 15cm.

go to stop and hereandthere.
