Adobe FrameMaker (2017 release)

The all-new
Adobe FrameMaker
(2017 release)

Easily author and publish multilingual technical content across mobile, web, desktop, and print.

Adobe FrameMaker (2017 release) is the industry-standard tool for authoring and publishing multilingual technical content across mobile, web, desktop, and print. Easily work with unstructured and structured content in the same documentation–however long and complex. Work faster and smarter with advanced XML/DITA capabilities. Publish content as Responsive HTML5, Mobile App, PDF, EPUB, Kindle, CHM, and more. Deliver next-generation HTML5 layouts with best-in-class search and navigation.

Be more productive with a reimagined authoring experience

Get started faster with the new welcome screen. Take full advantage of support for HD displays and the new interface. Do more with the new Project Manager and a reorganized menu which is now searchable, and displays keyboard shortcuts. Gain more working space with restructured pods.

Publish content for any device

Deliver your content to any device. Use new frameless Responsive HTML5 layouts with intuitive navigation and first-of-its-kind search autocomplete. Publish a Basic HTML5 output that is lightweight, easily sharable, and fully customizable.

Why you should buy
Adobe FrameMaker
(2017 release)?

Do more with advanced XML/DITA capabilities

Author with ease using the revamped DITA authoring templates, for DITA 1.3 and 1.2. Manage DITA cross-references optimally with multiple usability enhancements. Use the improved, resizable Keyspace Manager. Work easily with an enhanced structure view and new status bar that shows the element path.
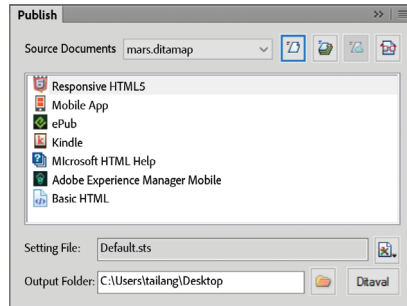

Top reasons to buy Adobe FrameMaker (2017 release)

- **Smoother import of Microsoft Word files**
  Map styles while importing Word documents into FrameMaker, or create new ones automatically from the imported styles. Bring in Word formatting and inline Word styles. Configure settings just once and reuse them across your Word documents.

- **DITA 1.3 support**
  Now get out-of-the-box support for DITA 1.3 topic types, including topic, task, concept, reference, glossentry, glossgroup, DITA, and the new troubleshooting learningObjectMap and learningGroupMap.
- **Out-of-the-box multi-channel, multi-device publishing**
  Deliver content to any device from within FrameMaker. Publish as Responsive HTML5, EPUB, Kindle, PDF, CHM and Adobe Experience Manager Mobile. Create content-centric mobile apps with a single click. Define settings once and share them organization-wide.

- **Next-generation Responsive HTML5 layouts**
  Deliver personalized content experiences with new frameless Responsive HTML5 layouts that have best-in-class search and navigation. Enjoy a richer viewing experience as layout icons have been optimized for HD displays. Show or hide widgets, such as glossary and TOC.

- **Search faster with autocomplete**
  Deliver a best-in-class search experience to end users with first-of-its-kind search autocomplete and more contextual search results. Provide users with automatic suggestions as they type, displaying the frequency of occurrence for each alongside.

- **Customizable Basic HTML5 output**
  Generate lightweight, easily sharable Basic HTML5 code with no layouts and JavaScript, which can then be customized via CSS for a unique look and feel.

- **Bidirectional language support**
  Enjoy support for right-to-left(RTL)
  languages— Arabic, Hebrew, and Farsi. Work with RTL and left-to-right (LTR) content in the same paragraph, document or book. Reduce DTP work with the new direction property. Set up the document and flip it—all inherited objects will also change direction.

- **Personalization with Dynamic Content Filters**
  Give end users a more personalized content experience with improved Dynamic Content Filters that now support indexes. Users can select appropriate filters to view relevant content.

- **Content personalization for DITA content**
  Now directly use DITA attributes for content as criteria in Dynamic Content Filters, making it even easier to create personalized content experiences for your end users.

- **Packager**
  Share projects easily with colleagues, subject matter experts, and translators. Create a self-contained package of your documents, books or DITA maps. The packager includes all dependent files, such as referenced files and images and configuration files.

- **Next-generation Responsive HTML5 layouts**
  Deliver personalized content experiences with new frameless Responsive HTML5 layouts that have best-in-class search and navigation. Enjoy a richer viewing experience as layout icons have been optimized for HD displays. Show or hide widgets, such as glossary and TOC.

- **Customizable Basic HTML5 output**

  Generate lightweight, easily sharable Basic HTML5 code with no layouts and JavaScript, which can then be customized via CSS for a unique look and feel.

- **Support for high resolution displays**
  Now work with the full clarity of high definition displays (up to 4K - 3840 x 2160), as FrameMaker automatically scales to fit the system resolution. Enjoy the new interface with crisp icons and a richer contrast ratio.

- **Revamped DITA authoring templates**
  Author with ease using the revamped DITA authoring templates, for DITA 1.3 and 1.2. Work more easily with the improved look and feel.

- **Search faster with autocomplete**
  Deliver a best-in-class search experience to end users with first-of-its-kind search autocomplete and more contextual search results. Provide users with automatic suggestions as they type, displaying the frequency of occurrence for each alongside.

- **Bigger and better welcome screen**
  Get to work faster with a new-age, more user-friendly welcome screen that allows you to quickly create new documents or open recent files. Also, access structured and unstructured items from one page. Connect to a repository or file system effortlessly.

- **Search for menu commands**
  Find menu commands faster by using the new menu search feature. Rather than looking for a command among the menu options, you can just type the name and hit enter.

- **Enhanced structure view**
  Work more easily with your XML structure. Show or hide text based on your convenience and need. Enjoy a larger work area by collapsing elements and attributes for entire sub-trees. Get a visual indication of the element in focus and validity of a drop.

- **Enhanced visual conditional indicators**
  Easily identify which conditions have been applied to various types of content, such as images, tables, graphics, and anchored frames, with consistent formatting. Use conditional tag formatting rules to easily identify conditional content in your document.

- **DITA 1.3 support**
  Now get out-of-the-box support for DITA 1.3 topic types, including topic, task, concept, reference, glossentry, glossgroup, DITA, and the new troubleshooting learningObjectMap and learningGroupMap.
